

Unified Control for Your Digital Channels

Today's restaurants are managing 10+ digital channels simultaneously. And it's all done manually...

EveryWare is a channel management solution that streamlines operations so you can realize your full revenue potential. As a layer that sits above your POS, it automates all of the manual work required to maintain menus, pricing, and promotions.

★ Key features

- Unified order processing
- Integration hub to easily add and manage channels
- Comprehensive analytics for a holistic view of your customers
- Update multiple menus from a single source
- Make instant changes to availability, pricing, and promotions

🔧 Benefits

- Reduce management time by 80-90%
- Increase revenue growth and expand your digital footprint faster
- Manage all channels from a POS-agnostic source
- Create tailored menus and promotions by channel
- Battle-tested API integrations for added flexibility

❓ Why use EveryWare?

- One solution for all your digital channel needs
- Designed to scale with your brand
- White-glove service with live troubleshooting
- Access to new features as soon as they're released
- Easy to experiment and test with new channels
