

VOICE AI

Drive-thru

Eliminate drive-thru bottlenecks and increase sales using intelligent voice AI

+25%
post-COVID drive-thru sales

1+
employees saved in labor costs

90%
of orders requires no human intervention

Challenges

- ▶ Hard to hear orders with existing audio hardware
- ▶ Limited POS integrations make it harder to reliably manage incoming orders
- ▶ Other drive-thru solutions require humans to supervise most orders
- ▶ Some solutions need high-cost tech to function, including menu boards and cameras
- ▶ Most AI drive-thru companies use old NLP/NLU technology

Features

- ▶ Built from the ground up using the latest LLM and audio technology
- ▶ Intelligent usage of HITL as an observer
- ▶ Custom prompts provide a unique experience for every customer

Benefits

- ▶ Reduced friction between staff and customers
- ▶ Eliminates wait time for customers
- ▶ AI never gets tired or forgets to upsell
- ▶ Labor can be reallocated to more high-value tasks
- ▶ Automatically ingest POS changes, including LTO's, dayparts, etc.
